

# ENERGY SERVICES & SOLUTIONS

SOLAR + STORAGE & OTHER SUSTAINABLE RESOURCES

**WERNER ELECTRIC**

# YOUR PARTNER IN THE ENERGY BUSINESS

The need for commercial solar power is growing at an unprecedented rate. And the demand for reliable, next-generation storage is increasing exponentially. Determining the right Solar + Storage system, along with managing the design and implementation, can be a complex process.

That's why it's critical to align your energy projects with experts who have invested an unequalled amount of time and resources to becoming a proven industry leader.

Werner Electric provides exactly what you need to efficiently and effectively help your customers benefit from the savings and sustainability Solar + Storage offers.

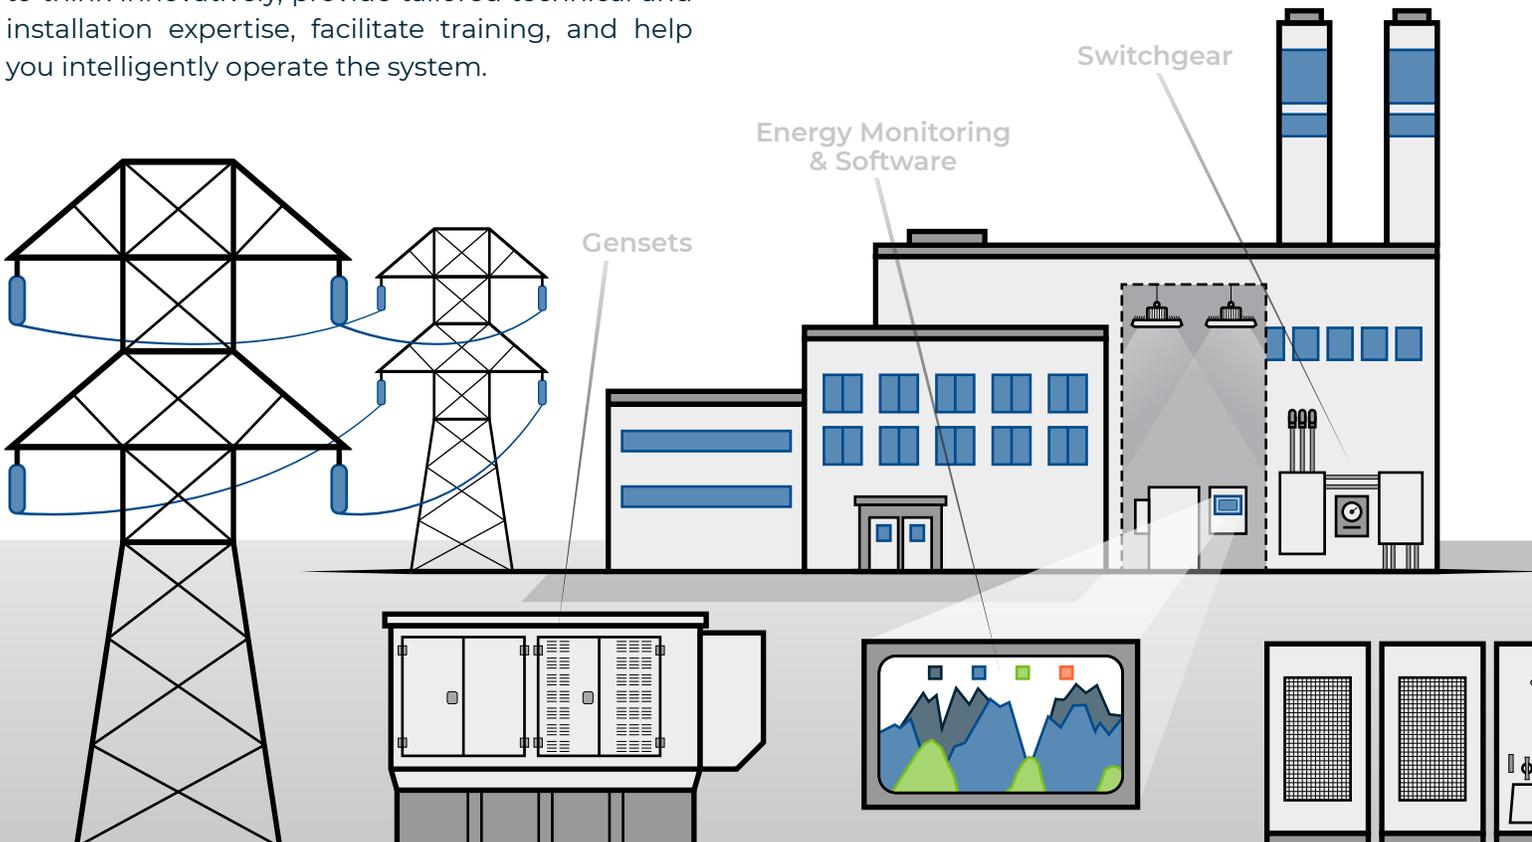

## EXPERTISE BORN FROM EXPERIENCE

Adding storage capabilities to a solar installation enables users to more intelligently deploy energy and make the most of their energy system. Recent advancements in storage technology make solar + storage far more practical in many more locations.

But, because combining solar and storage is a new approach, not everyone will offer you the right kind of experience. The Werner team of NABCEP-certified Energy Specialists has a long history of partnering with the best solar and storage industry experts. That experience gives us the ability to think innovatively, provide tailored technical and installation expertise, facilitate training, and help you intelligently operate the system.

## FROM PREPARATION TO POWER...AND BEYOND

Werner is able to help you accurately analyze your project. Then, our specialists work with you to determine exactly which custom solution works best for your needs. For example, determining the optimal sizing is critical to ensuring the best ROI for your system. Our specialists employ the most up-to-date modeling and simulation software to determine the specific size and operating protocols to maximize the project returns. And even when the system is up and running, we're there to make sure it stays that way.

# SOLAR + STORAGE: THE SMART, PROFITABLE GROWTH OPPORTUNITY

Solar + Storage is the best way to shave peaks to make energy use – and cost – far more predictable and manageable. It is the future – and it's why we've invested in developing our expertise. Werner has the skill and experience to help differentiate your business with your customers – and keep your projects organized and on-budget.

## ALL THE PIECES OF THE ENERGY PUZZLE, IN ONE PLACE

When you work with Werner, you never have to take your eyes off your core business. That's because we have your back on every phase of every project.

### PV MODULES

The right product specifications and configuration ensures that you'll generate the most power with the best return on investment.

### INVERTERS

Microinverters, string, or central inverters? That's our job to know.

### MOUNTS & RACKING

Specific locations require specific solutions. We help design one that makes the most sense.

### ENERGY MONITORING & SOFTWARE

Maximize the performance of your entire solar + storage system through energy management software and understand where your energy is going with the right monitoring system.

### BALANCE OF SYSTEM COMPONENTS

We provide everything needed to solidify your installation; wiring, pipe, and essential components.

### STORAGE

The right system to help you even out the load and increase savings on your utility bill.

### SWITCHGEAR

The right electrical components to safely interconnect you to the power grid.

### EV CHARGING

Facility and electric vehicle fleet owners can capitalize on intelligent energy management.

### GENERATION

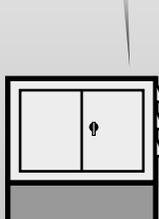

Classic gensets may also be a good fit for the project depending on customer requirements.

Electric Vehicle Charging Stations

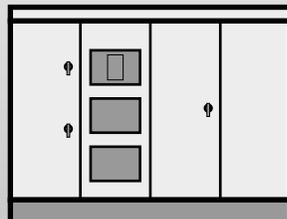

Energy Storage System

## MORE WAYS TO HELP BRIGHTEN YOUR CUSTOMER'S BOTTOM LINE

In addition to Solar + Storage, Werner can help design and implement energy-efficient solutions that save more than time, energy and money — they're paving the way for a more sustainable energy future.

Our Energy Solutions team is bringing forward new and innovative technologies, including high-efficiency, environmentally responsible, renewable energy solutions designed to drive your business.

**We've already helped a wide range of clients find success — and we can put that experience to work for you and your customers.**

### **SOLAR POWER**

We'll help you find the best technology and solutions for your next solar energy project.

### **LIGHTING & CONTROLS**

We can help you with lighting solutions, new or retrofit, commercial or industrial, throughout the planning, design, and implementation process.

### **ENERGY STORAGE**

Reduce your dependency on net metering by storing energy. Save money every day by shaving peaks to make energy use far more predictable and manageable.

### **ELECTRIC VEHICLE CHARGING STATIONS**

With consumers making the move to electric vehicles, building a charging station infrastructure is required. Werner energy specialist can help you design, build, and integrate EV charging stations into your energy management project.
